

Are you Generation IM?

10 Great Uses for Immersion's VibeTonz®-Enabled Mobile Phones*

- 1 Rev up ringtones:** Indulge your inner mix-master and synchronize the sense of vibrations with music. You can get ringtones with touch sensations and match them to each of your friends' calls. Kind of like a secret handshake.
- 2 Play hard:** Experience the feel of cobblestone streets, machine gun bursts, and light saber pulses right in your mobile. Or feel the asteroids hit and bounce off your star ship and get the sensation of fighting for control as you approach the speed of light. Before games were boring, just graphics and sound. Now you can feel the action, even with the sound turned off.
- 3 Get more than just the beat:** Feel all the instruments of your favorite song, not just the bass line. Be the first of your friends with a tune in the phone that grooves with touch sensations.
- 4 Feel your way to your phone:** No more "phone hide and seek" and missing that important call while you're digging through your backpack. A VibeTonz phone lets you feel your way to the phone.
- 5 Be discreet:** Let your phone tell you who's messaging, even with the sound turned off. Mom may be cool, but she can wait—not quite the same as that special friend with news to share.
- 6 Be real:** Take your virtual pet to a whole new level—feel the gentle purr of Sylvester when you feed and pet him.
- 7 Let the vibe say it:** Having trouble making up after a fight? Send a virtual heartbeat or hug to say how you feel and smooth it out.
- 8 Share a laugh:** Next time your best friend sends a funny, respond with a virtual laugh that tickles their fingers. It's way cool.
- 9 Make it "My mobile":** Tune up your phone with cool touch features and show your friends how you've set them—just the way you want. It's different, and best of all, yours alone.
- 10 Get the message:** Your unread messages can have a different feel than the others, so you can find them fast and stay in touch.

*Not all features are implemented in every VibeTonz-enabled phone. Contact your mobile phone service operator for more details on the features available to you.
